

REMACO

SAS Series....

Remaco Semi-Automatic Screen (SAS) is the revolutionary product of the decade! Its unique features and functions have changed the way a normal screen should perform. No more hassle and problems (faced when using manual pull down screens) ever again when you use Remaco SAS Screens.

- P Ease of installation
- P Able to shift screen horizontally
- P Excellent performance and high quality
- P More durable (Due to smooth roll up)
- P Compact and light weight
- P Unique Auto-Gear Mechanism allows screen to roll up smoothly like a motorized screen.
- P Precise stop position when pulled down.
- P User friendly (No hassle to stop at any desired position)

Standard Screen Sizes

Model	Diagonal (Inches)	Width x Height
SAS-1515	75"	62" x 62" (157 x 157 cm)
SAS-1818	90"	72" x 72" (183 x 183 cm)
SAS-2121	100"	84" x 84" (213 x 213 cm)
SAS-2424	120"	96" x 96" (244 x 244 cm)

Black Borders, Video Format (4:3) and HDTV Format (16:9) also available.

Semi-Auto Screen

Common problems associated with normal manual screen.

When pulled down, normal manual screen cannot stop at your desired position due to poor stopping mechanism, causing frustration to the user. Damages of the screen is inevitable if too much force is used to pull down the screen.

When rolled up, normal manual screen either jammed or rolled up too fast, causing a loud impact when the bottom bar hit the frame. This will cause damages to the screen too!

T H E S O L U T I O N !

Auto-Gear Mechanism is an innovative designed gear system that stop at your desired position when pulled down and released. To roll up, just pulled down slightly and release, the unique Auto-Gear Mechanism will wind the screen up slowly and smoothly just like a motorized screen. Simple as that, no more hassle and damage to the screen.

Easy Horizontal Alignment

Screen can be adjusted horizontally even after installation. This is very useful function especially when you need to align screen to suit your projection image.

Specifications :

- Screen Gain:** 1.2
- Viewing Angle:** 160 degrees (horizontal) ; 150 degrees (vertical)
- Screen Materials:** Matte White with fibreglass coating,
Flame Retardant and fungus resistant
